17<sup>th</sup> December 2020,

Dear Valued Customer, 尊敬的客户：

We are excited to inform you that starting in 2021 Pentair will officially release the enhanced “PCA” version of the CPR controllers from our Bovisio, Italy facility. In order to make room for the new design Goyen’s 10, 100, 20 & 200 series of controllers will be phased out and retired starting the 1st of January 2021. 从2011年1月1日起，所有由MECAIR意大利工厂生产的GOYEN品牌型号10，100，20和200型脉冲控制仪将停产。

Along with this transition, starting on January 1<sup>st</sup>, 2021, Pentair will be phasing out the Mecair MTS, MT, MPS, MCS & MSC series of controllers. During the phase out process, limited stock will be available. Please contact your local representative with any questions.

同时，所有MECAIR品牌的脉冲控制仪型号MTS, MT, MPS, MCS和MSC型也将停产。

The PCA upgrade brings increased capability, functionality and performance benefits to various bag filtration systems and in order to insure a seamless transition, Pentair personnel are available to address any needs, as well as to arrange a detailed technology webinar. In addition, attached you will find a quick reference comparison table that provides the equivalent replacement CPR controller.

以下是新旧型号替换表：（新型号控制仪将同时标出GOYEN和MECAIR品牌）
