

FastLinkcabsys Optical Fiber Solutions

Product overview

Fastlinkcabsys Optical Fiber cabling system is an enhanced optical network cabling solution. The optical Fiber meets the physical protection in different environments, and provides excellent optical performance, which is in line with the current application of optical network bandwidth. This set of products also has flexibility, stability, capacity expansion and system integration flexibility, and can face the development of ultra-high speed network technology in the future.

OS2	TeraCap/TeraSafe Singlemode	ITU G657A BI-OS2 Bend Insensitive zero water peak Singlemode fiber
OM 1/2	BaseCap/HiCap Multimode	ISO/IEC11801 OM1 fiber ISO/IEC11801 OM2 fiber
OM 3/4	MAXCap Multimode	ISO/IEC11801 BI-OM3 Bend Insensitive fiber ISO/IEC11801 BI-OM4 Bend Insensitive fiber
OM5	MAXCap Multimode	ISO/IEC11801 BI-OM5 Bend Insensitive fiber
