KDEV-L-09

Customizable:  high temperature

Product characteristics

- The sensor adopts stainless steel shell, round shape, structure is strong and durable. It has good natural linearity, strong anti-eccentric load ability, high precision, low profile height, easy and stable installation.
- Widely used hopper scale, truck scale, track scale and other electronic scales.

KDEV-L-A0

Customizable:  high temperature

Product characteristics

- It is made of sensor special alloy steel, sealed with adhesive, anodized on the surface, suitable for various working conditions, simple structure, convenient installation and double-direction stress. It is suitable for testing machine, hydraulic press, cold and hot press, electronic hook scale, Hopper scale, etc. .

KDEV-L-F06

Customizable:  high temperature

Product characteristics

- Made of high-quality stainless steel, small size, high precision, stable structure. It is convenient to be installed in narrow space and widely used in automatic equipment and other fields.

KDEV-L-F11

Customizable:  high temperature  waterproof

Product characteristics

- The sensor is made of strain structure, small size, low height and all stainless steel. Customizable high-temperature performance, suitable for auto press assembly, automatic assembly, 3C product test, New Energy Product Assembly, medical inspection, robotics, and other industrial test and control systems.
