

Tension sensor

Tension sensor is used to measure the tension value of coiled material in the process of tension control. According to its con guraton, it can be divided into three types: axle-table type, through-axle type, cantilever type, etc. , suitable for all kinds of optical ber, yarn, chemical ber, metal wire, wire, cable and other places. To meet the needs of various industries tension measurement: wood production, construction materials, lm cutting, vacuum coating, coater, lm blowing machine, tire molding machine, steel cord cutting machine, slitting production line, aluminum foil coating production line, coiling production line, color coated plate production line, optical ber equipment, plasterboard production line, cord canvas impregnation machine, carpet production line, batte stacking machine, lithium electric slitting machine, lithium electric rolling die machine and other industries.

Mounting dimensions

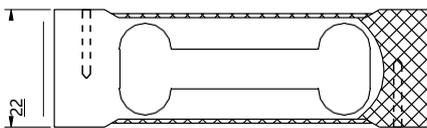

KDEV-Z-30

Product characteristics

- The measurement accuracy is better than 0.02% , balance level, good long-term stability, high repeatability, small size, small installation space. Widely used in commercial, civil and other high-precision weighing instruments, commercial scales, small and medium-sized space of high-precision force measurement industrial automation equipment.

Force mode

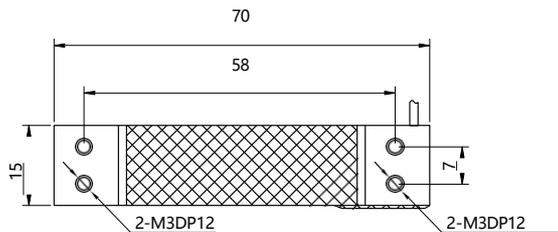

Technical parameters			
(Measuring range)	0.3/0.6/1/2/3/5/10 kg	(Sensitivity temperature effect)	±0.025%F.S/10°C
(Composite Error)	≤±0.02%	(Zero temperature effect)	±0.025%F.S/10°C
(Non-linear)	0.02%	(Temperature compensation range)	-10~40°C
(Sensitivity)	1.0/2.0±0.15mV/V	(Operating temperature range)	-20~60°C
(Creep)	±0.03%F.S/30min	(Excitation voltage)	5~125V
(Zero output)	±1.0%F.S	(SAFE overload range)	120%F.S
(Input impedance)	400±10Ω	(Limit Overload Range)	150%F.S
(Output impedance)	350±10Ω	(Cable specifications)	Φ3mm×3m
(Insulation Resistance)	≥5000MΩ/100V DC	(Protection level)	Ip65

Mounting dimensions

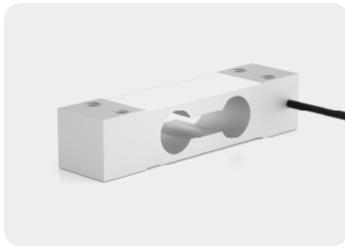

KDEV-Z-3A

Product characteristics

- The measuring precision is better than ± 0.02% , the long-term stability is good, the repetition consistency is high, the volume is small and the small space installation is convenient. Widely used in commercial, civil and other high-precision weighing instruments, and industrial automation in small space high-precision force measurement, weighing equipment.

KDEV-Z-50

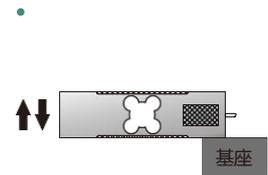

Product characteristics

- KDEV-Z-50 is a high precision box structure single point load cell, high precision, easy to install commonly used in electronic platform scales, mechanical testing machines, electronic weighing platform, tank reactor weighing system is the
- most widely used platform scale sensor structure. It is widely used in the test of anti- eccentric load.

KDEV-Z-8E(steel)

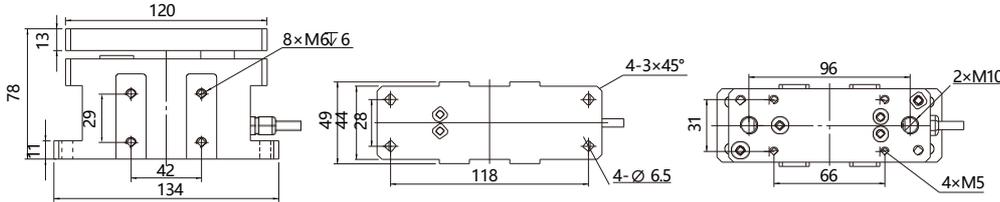

KDEV-Z-8F(aluminium)

KDEV-Z-8E(steel) / KDEV-Z-8F(aluminium)

Product characteristics

- The tension sensor adopts Mitsubishi structure and the design of tension-compression type, which makes the response frequency greatly increased, and the output signal has the characteristics of good
- linearity and fast response. The sensor is widely used in printing, composite, coating, cutting, paper, rubber, textile, wire and cable and lm take-up control equipment and production lines.

KDEV-Z-8H

Product characteristics

- The utility model has the advantages of strong structure, long service life, simple installation and stable performance. Applicable to all kinds of optical fiber, yarn, chemical fiber, metal, wire, cable, tape, steel belt tension measurement, widely used in electronic, chemical, textile, paper, machine and industrial automation measurement and control fields.
