1.3 Security notice
Read the user manual carefully: Before using, please read this operating manual carefully and follow its operating methods to use this product.
1.3.1
Power supply: Please use the power supply with the specifications specified in this operating manual to avoid irreparable damage to the product; And be careful not to use too many electrical equipment on a single socket, which may cause a fire. If you are unsure of the power supply specifications, please consult seller or local distributors.
1.3.2
Heat source: Regardless of whether this product is in working condition or not, it should be placed in a well ventilated place and away from other heating equipment or environments, such as heaters, electric heating equipment, gas stoves, etc., to prevent this product from not working properly and causing irreparable damage.
1.3.3
Moisture moisture: Regardless of whether this product is in working condition or not, please keep the environment dry and avoid using this product in excessively humid environments, such as damp basements, swimming pools, etc
1.3.4
Foreign object intrusion: Users can remove the screws at the bottom of the machine to replace the hard drive. There are no manually added or modified items for users to disassemble in other parts; So, under the guidance of our company, please do not disassemble the product casing at will to avoid foreign object intrusion, damage to product protection services, or contact danger.
1.3.5
Load bearing overload: Do not place other heavy objects on this product or allow it to be subjected to heavy blows and squeezing, in order to prevent it from working properly.
1.3.6
Lightning strike prevention: If this product is not used for a long time or if there is a risk of lightning strikes due to expected weather changes, it is recommended to remove the plug of this product to prevent damage caused by lightning strikes.
Repair: If this product does not work properly, please contact our company for technical guidance or provide repair services:
Note: The equipment should be connected to a power grid output socket with protective grounding and use a power plug and appliance coupler as a section connection device. The section connection device should be easy to operate.
1.3.7
Protecting the hard drive: During use, it is prohibited to move the karaoke machine. After completing use, first click on the screen shutdown soft shutdown, or the mobile app shutdown. 2. -3 minutes. Wait for the machine to store data before turning off the power. If the machine is not used for a long time, it is necessary to cut off the power supply or turn off the song machine switch to avoid the prolonged standby state of the machine affecting its service life.
