Appendix IV. Trouble and exclude

Faults	Possible causes/resolution
When you turn on the keyboard, it will be some noise.	Do not worry, it's the normal phenomenon.
When turn on the power switch, play with the keyboard, it's no voice at all.	Check the main volume button if it is in the proper position and headphone jack was connected with other equipments, so that the built-in speaker system cut off.
Distortion sound or interruption, or even can not work at all.	Use unqualified power adapter or the electric power of the battery is not enough, pls use the power adapter that equipped with this keyboard or replace the batteries.
The note and the timbre of the note has the slight difference in a tone.	This is normal phenomenon caused by different tone sample diapason.
When use the function of sustain, some tone has long sustain but some has short sustain.	This is normal phenomenon because the best length of the sustain of the different tone has been set.
The main volume and the accompaniment volume is abnormal.	Check the main volume and the accompaniment volume are set at the proper position.
In sync function, but the auto accompaniment does not work.	Check whether single chord or finger chord were set. At this situation, play 19 keys in the left of the keyboard.
When use the external adapter, put on the power switch, no sound, LCD no display.	Check whether power socket has the electricity, and the power adapter was well inserted, the power jack has the poor contact or the voltage is not enough.
When use the batteries, the keyboard is no sound when put on LCD has no display.	Check whether batteries polarity was correct and the batteries has run out.
The pitch of note is not correct.	Check whether the parameter of transposes is "00".
When use the mobile phone, the keyboard has the noise.	Mobile phone can disturb the keyboard, to avoid the noise, pls turn off the phone or use it in far place.
