Technical Specifications

■Carried Standard
• GB/T13837-2012 GB17625.1-2012
  GB8898-2011

■Polyphony
• 128

■Keyboard
• 88-key standard keyboard with touch response

■Display
• LCD display

■Voice
• 360 kinds of voices

■Style
• 160 kinds of styles

■Demo
• 80 kinds of demo songs

■Effect control
• Touch、Reverb、Chorus、Dual、Split、Function menu、Sound console

■Record
• Single track、Multi tracks combined record

■Accompaniment control
• Accompaniment volume、transpose control、MP3 function

■Chord control
• A.B.C auto chord、keyboard chord

■Memory state
• Double memory groups,8pcs position storage,which can store voice part,Effect accompaniment data

■Pedal
• Soft Pedal、Sustain Pedal

■External function
• DC power input、USB(MP3) jack、output、suspedal、MIDIIN/OUT jack、USB(MIDI) jack

■Intonation
• ≤3 cents

■Packing size
• 151.5X65.8X39.5CM

■Weight
• 41.30Kg

■Power
• DC12-15V,2A-3A

■Random accessories
• Adapter、song sheet holder、manual

Record your own songs

The record function of this piano can record/replay your performance,you can appreciate your own opus by replaying.You can record many pieces of users'songs in this piano,every song can record 3pcs tracks at most,it is 1pc accompaniment track and 2pcs melody tracks.
The accompaniment track was used for recording style,it is songs'accompaniment,The melody track was used for recording playing melody.The accompaniment track and melody track can record at the same time,but,it cann't record 2pcs melody tracks at the same time,of course,you also can only record melody or accompaniment separately;The accompaniment track and melody track can replay at the same time.
The users'song has storage function if there is power-fail,the data cann't loss when the power is off.

Start record

You need to choose one pc user's song that will be used for storing record before the record was starting and set record tracks.

1.Pressing【RECORD】button to enter into users'songs selection interface.The left top of LCD displays serial no. of users'songs,The characters display area displays users' songs name,The default name is "RecSong1".You can choose users'songs that need to store record by 【-】/【+】buttons.

2.Pressing【RECORD】button to enter into record preparation state,"REC"marking lights in bottom part of LCD,4pcs beat points shine at the same time in beat display area.This piano will choose one melody track that has no data to store your record automatically,The track cursor shines in LCD ,it refers to the present track that stored record.

3.You can choose voice、style，adjustment tempo etc.that you want to record in record preparation state.You can press 【TRACK1】、【TRACK2】~【TRACK3】button to choose the tracks that you want to record,it means that the track was choosed when cursor shines.The accompaniment track and melody track can record at the same time,but cann't record 2pcs melody tracks at the same time.

4.To press【START/STOP】button or play piano's keys directly to start record after the record tracks were choosed.When the record accompaniment was choosed and the auto bass chord accompaniment function was opened,to play one effective chord in keyboard left hand area,the record can be started as well.

Notice:
The style data can only be recorded in accompaniment track.
The record track cursor has three kinds of state:Shine,Light,Go out.
Shining,it means that this track has been choosed for record,if this track has already have data, the original data will be covered if you continue to record in this track.Lighting,it means that this track has data,It wil replay recorded data synchronously in record process.Going out,it means that this track has no data or has data,but has been prohibited to replay when the record was going on.The tracks state can be switched by pressing【TRACK1】~【TRACK3】again and again in record preparation state.
This piano will choose one empty melody track to store record automatically (the system will choose automatically in the order of small to large.such as:if track2 has data,then,the system will choose track3 to store this time record)in record preparation state,if two tracks had already have data,then,it will choose track2 to store record.
