

61-Key Professional Performance ◀ LCD Electronic Keyboard ▶

Operation Instruction

- 61 key standard keyboard with touch
- Large Screen backlight LCD displaying
- 128 kinds of standard tone
- 128 kinds of world popular rhythm
- Demo
- 61 pcs of keyboard percussion and 8 pcs of panel percussion
- Dual voice function performs two kinds of tone at the same time
- Single finger, fingered, comprehensive chord
- Real-time recording and rhythm programming function
- Teaching and one key intelligent teaching function
- 3 groups of state memory to be tuned out for use flexibly in performance
- Sustain and vibrato function
- Sync and Fill-In function
- Pitch Bend Function, MIDI out

Cautions

ARK-2171

Note: Please read these cautions carefully before use.

Be sure to obey the following cautions so as not to harm yourself or others and damage this instrument or other external equipments. These cautions include (but are not limited to) the following:

1. Do not open the casing of the electronic keyboard and try to disassemble any parts of it, or make any change to the inside. There is the abnormal function in use, please stop operating it and send it for overhauling by qualified serviceman.
2. Keep the electronic keyboard from rain and do not use it near water or in wet condition. Do not place the vessel that holds liquid on the electronic keyboard for fear that the liquid flows into the electronic keyboard and impairs the internal parts.
3. Better use the specified voltage (220V, 50HZ), the wrong voltage can cause the damage, overheating and voice change of the electronic keyboard.
4. Please unplug the power plug before cleaning the body of the electronic keyboard. Do not insert or unplug the power plug with wet hand.
5. Check the power plug regularly and clear out the dirt that piles up on it.
6. Do not place the power adaptor or power cord near heating source such as central heating or heat radiator. Do not overbend wire and place heavy objects on wire. Do not place the wire on the routeway, do not wind other objects with wire to avoid damaging wire.
7. You should hold the plug and you shouldn't pull the power cord when you unplug the power plug.
8. Do not insert the power plug of the electronic keyboard in multi-purpose terminal board to avoid the socket overheating.
9. When you do not use the electronic keyboard for a long time or in the thunder state, you should turn off the power and unplug the power adaptor or power cord.
10. You should turn off all the power before connecting the electronic keyboard with other electric appliances. You should adjust all the volume potentiometers or +/- Buttons to the lowest position before you turn on and turn off these electric appliances.
11. Do not place the electronic keyboard in dusty, vibrating, cold or high-temperature environment (such as the place where the sunshine shines directly, the neighbouring place of the central heat or the car in the sunshine) to avoid damaging appearance or internal parts.
12. Do not place the electronic keyboard in an unstable place to avoid falling and damaging.
13. To clean the electronic keyboard, wipe it with dry and soft cloth. Do not use paint dope, organic solvent or chemically impregnated cloth to wipe it. Do not put the vinyl plastics products on the electronic keyboard to avoid the fading of the panel and keyboard.
14. Do not sit on the electronic keyboard or place heavy objects on it.
15. Do not perform the keyboard with the loudest or uncomfortable volume for a long time to avoid hearing decline.
16. Please throw away the plastic bag or keep it away from the infant or children after disassembling to avoid the danger of suffocating infant or children.
17. The keyboard can be used after the package was disassembled by adult.
18. The inner small objects in the packing are not suitable for use of the children under 3 years old.

Appendix VIII. Technical Specifications

16

Carried Standard	GB8898-2011 GB17625. 1-2012 GB13837-2012
Keyboard	61 key standard piano keyboard with touch
Displaying	Backlight LCD displaying
Tone	128 kinds of standard tone
Rhythm	128 kinds of world well-chosen auto accompaniment
Demo	30 pcs of Demo
Effect control	Vibrato, sustain, pitch bend, transpose, touch, dual voice
Recording	Recording, playback, the real-time recording function of the 240pcs of tone
Programming	Rhythm programming function
State Memory	3pcs of state store memory, which can set the state of the tone, rhythm, tempo for use.
Percussion	61 kinds of keyboard percussion, 8 kinds of panel percussion
Accompaniment control	Star/Stop, Sync, Fill-In
Chord control	Chord close, single finger, fingered, comprehensive chord
Intelligent Teaching	Demo, One Key Teaching, Teaching
Other Control	Power Switch, Volume Control, Keyboard percussion, Tempo, Metronome
External Jacks	Power Jack, Headphone Jack, Left and Right Sound Track out, MIDI out
Diapason	C2~C7
Intonation	≤6 cent
Specifications	955x380x135mm
Weight	5 KGS
Power Adaptor	AC220V, DC12V
DC Input	DC12V
Output power	6Wx2
Quiescent current	110mA

Trouble	Possible Reason/Resolution
There is a little noise when turn on or turn off the power	Normal phenomenon,please don't worry.
There was no sound when you pressed the keyboard after the power was on.	Check whether the master volume button was set at proper position or headphone out jack was connected with other equipments so that the built-in speaker system cutted off automatically.
Sound distortion or interruption,seriously, the electronic keyboard can't work	Used unqualified power adaptor or the electric power of the battery isn't enough.Please use the power adaptor was equipped with this electronic keyboard or replace the batteries.
The note and the timbre of the note has the slight difference in a tone.	This is normal phenomenon caused by different voice sampling diapason.
When you use sustain function,some tone has the long sustain but some has the short sustain	This is normal phenomenon because the best length of the sustain of different tone has been set.
The overall volume or the accompaniment volume is abnormal.	Check whether master volume control and accompaniment volume control are set proper position.
In Sync status,auto accompaniment doesn't work	Check whether Single Finger or Fingered was set.Now play a note at left-hand keyboard area(19 keys in the left of keyboard).
When use mobile phone,the electronic keyboard has the noise.	Mobile phone can disturb the electronic keyboard.To avoid the noise,please turn off the mobile phone or use it in far place.
When use the external power,there was no sound when the electronic keyboard was open.LCD didn't display anything.	Check whether power socket has the electricity,the power adaptor was well inserted,the power jack has the poor contact or the voltage isn't enough.
When use batteries,there was no sound when the electronic keyboard was open, the LCD didn't display anything.	Check whether batteries polarity was correct and batteries have been run out.
The pitch of nore is not correct.	Check wherher the parameter of Transpose is '00'.
In the ensemble of the electronic keyboard with the band,the pitch of the electronic keyboard has the deviation with other musical instruments	Check whether the parameter of Transpose is "00" or adjust the Transpose function as to thepitch of the electronic keyboard can be identical with the band.

1. Use AC-DC Power Adaptor

Please use the special AC/DC power adaptor which was equipped with this electronic keyboard or the power adaptor with DC12V voltage out and 500mA current out and with central anode plug. Insert the DC plug of power adaptor into the DC12V power socket in panel of the rear of the electronic keyboard, then, insert the other end into Mains jack (Please notice: the input voltage of power adaptor must conform to the voltage of Mains), finally turn on power switch and start performance.

Caution: When you do not use this electronic keyboard, you should unplug the plug of power adaptor from power socket safely to avoid the parts trouble or other accident for long-term charging.

2. Use of Batteries

Install batteries firstly. Open the battery lid at the bottom of the electronic keyboard and load 8 pcs of 1.5V Size D batteries (SUM-1, R20 or equivalent). Ensure the polarity of the batteries should conform to the anode and cathode direction of batteries marked on battery lid. Cover the battery lid after the installation. Finally turn on power switch and start performance.

Caution: The battery voltage will go down to a certain range when the electrical quantity of the batteries isn't enough. This phenomenon will cause some abnormal situation. Such as the electronic keyboard can't sound normally, the LCD display screen is bleak, the information displays in disorder, you should replace a new group of batteries.

Do not use different kinds of batteries at the same time and mix new and old batteries for use. Please take out the batteries as to avoid the possible damage caused by the batteries leakage if you don't use the electric keyboard for a long time.

3. Use of Headphone

Insert headphone plug into "HEADPHONE" jack in the rear of the electronic keyboard. Now the internal speaker system of the electronic keyboard cuts off automatically. Use of headphone during performance doesn't interfere with others. It is special for personal monitor and exercising at night.

4. Connection with Amplifier or Hi-Fi Equipment

This electronic keyboard has built-in speaker system. Alternatively, it can be connected with other external amplifier or hi-fi equipment for use. First turn off the power of electronic keyboard and external equipments, then, insert one end of stereo audio cable into LINE IN or AUXIN jack of other hi-fi equipment and insert the other end into audio L/R out jack in the panel of the rear of the electronic keyboard.

6. Description of LCD displaying function

1. Model and State Displaying Function: The work model of this electronic keyboard and the work state that it is in. There is the corresponding function indication ①~②① on the LCD.

2. Name and Digital Displaying Function: Under normal conditions, the ②① displays the current tone name or the current rhythm name in the characters displaying dot matrix area based on the user's setting. It is the abbreviation of the tone if the current displaying is the tone name. Three positions digital displaying area ②① displays the corresponding tone number or rhythm number. Under the model of Demo, it displays the current song number.

In the model of the recording and programming. The characters displaying area displays "FULL" as the indication when the recording is full. The digital displaying displays the current level number in the state of volume, rhythm volume and transpose.

3. Beat Indication Function: When the beat is being played, the metronome ⑩ shines in right or left which follows the different beat.

4. Note Displaying Function: In the teaching model, the ⑩⑨ in the keyboard key area has the corresponding displaying on the LCD. In the model of Demo, One Key and Teaching. The keyboard key area has the corresponding displaying which follows the main volume on the LCD.

I Basic Performance Method

1.Turn On Power

After AC/DC adaptor was connected well or batteries were installed correctly,press[POWER] button to turn on "POWER".The LCD screen displays the default information in the startup situation.Then,press this button again,this button bounces,the power was closed.

2.Adjustment of the Master Volumea

This electronic keyboard has 8 levels"VOLUME",from 1 to 8 for your choice.The default value of the master volume is 6,press[MASTER VOLUME]+/- button,the master volume has the corresponding increase or decrease. The LCD volume displaying has the corresponding change as well. The volume will recover the default value automatically if you press the [MASTER VOLUME]+/--button at the same time.

3. Tone Selection

This electronic keyboard has 128 kinds of tone(0-127) for your choice.For detailed information, please refer to the Appendix I (Table of Tone).

The default state is the tone in the startup situation.You need to press the [TONE]button if the current state isn't the tone state.There is the corresponding displaying on the LCD,the character displays the current tone name.The default tone is GrdPno(Acoustic Grand Piano).The LCD displays the number of the current tone is "00".To select the tone between 00-99,input two-digit number by the number buttons.You should press the number button [1] for about two seconds if you want to input the tone between 100-127. The LCD displays the tone number that are waiting for choice on the hundreds place is 1--,the underliningposition is the digit position that are waiting for choice .You can choose the tone between 100-127 if you continue to input two-digit number by the number buttons.You can also do the loop selection for the tone between 100-127 if you press the [+],[-]buttons at the same time.The system will return to the current tone automatically if you haven't input the number completely and you haven't any action for 4 seconds

4. Percussion Instruments for Performance

1) Panel Percussion. Press [PANEL PERCUSSION] button (there are 8 kinds of panel percussion Instruments in total, as the sign shown under the corresponding buttons or refer to the Appendix III-Table of Panel Percussion), the corresponding percussion can occur. You can fill in the corresponding percussion to enhance the performance effect based on your requirement.

2) Keyboard Percussion. Press [KEYBOARD PERCUSSION] button, now the keyboard converts into the percussion keyboard. Every keyboard key corresponds with one kind of percussion Instrument (61 pcs of white and black keys correspond with 61 kinds of keyboard percussion, as the graphic symbols shown above the keyboard or refer to the Appendix V-Table of Keyboard Percussion). Then, press [KEYBOARD PERCUSSION] button again, the keyboard will recover the normal standard keyboard.

Start keyboard Percussion performance

II. Auto Rhythm

1. Rhythm Selection

This electronic keyboard has 128 kinds of rhythm (0-127) for your choice. For detailed information, please refer to the Appendix II-Table of Rhythm. Press [Rhythm] button to enter the rhythm function, the default rhythm is [Soul 1], the character displaying area displays current rhythm number, displays current rhythm number "00". To select the rhythm between 00-99, you just need to input two-digit number. You should press number button [1] for about two seconds if you want to input the rhythm between 100-127. The LCD displays the rhythm number that are waiting for choice on the hundreds place is 1, the underlining position is digit position that are waiting for choice, then, input the two-digit number in the back. The system will recover the current rhythm automatically if you haven't input the complete number and you haven't any action for about 4 seconds..

2. Fill in

You can fill in a length of interlude to enhance the performance effect if you press the [FILL-IN] button during the rhythm playback, then, the rhythm will continue to perform based on the original rhythm.

VIII. Intelligent Teaching Function

1. Demo

This electronic keyboard has 30 pcs of Demo in total, The table of Demo, please refer to the Appendix III.

Press [DEMO] button to do the loop playback about the Demo, The LCD displays [SONG], the number displays the current demo number. The keyboard displaying area displays the current song note. The playback will stop if you press [DEMO] button during performance. You can press number buttons or "+" "-" to select the song.

2. Teaching Function

Press [TEACHING] button to enter into the teaching function, the LCD displays [STEP2], then, select the song through the number buttons or "+" "-" buttons to start the teaching. When one song was over, the electronic keyboard can continue to teach if you pressing the number buttons to reselect the song. The LCD screen displays current teaching song number, the keyboard displaying area displays the main melody note of current song. The main sound of the song will be closed over when you learn to perform the keyboard keys. The main sound will recover to learn this key performance if you haven't played the keyboard keys for 3 seconds.

3. One Key Teaching

Press one key [STEP 1] button to enter into the teaching function. Then, select song by the number buttons to start the teaching. After this song was over. The electronic keyboard can continue to teach if you reselect the song. The LCD screen displays the current teaching song number, the keyboard displaying area displays the main melody note of current song.
