Tap filter

UF Faucet Purifier (LT-F4)

Back wash GAC & Rinse UF type

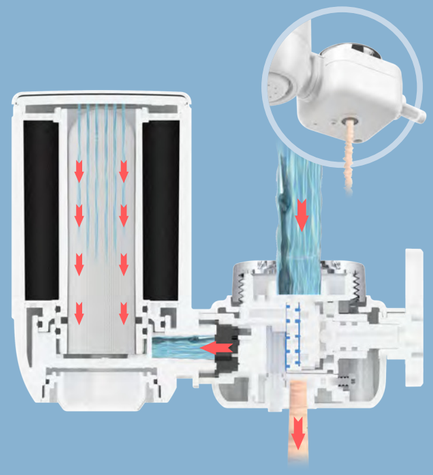

Back wash carbon filter

Independent drain outlet

Rinse UF filter

Independent drain outlet

Ceramic valve switcher

- Ceramic valve disk, no leakage
- Long life
- Back wash and rinse

Diagram of 4 Working Position

Back wash carbon filter

Back wash GAC carbon filter

Water purify

Purify by GAC+UF

Tap water

Shower water from tap water

Rinse UF filter

Rinse UF filter with purified water by GAC filter

Back wash & Rinse type (LT-F4)

Carbon Fiber + UF

- Back wash carbon fiber filter (or ceramic filter)
- Rinse UF filter with purified water by carbon fiber filter (or ceramic filter)
- Water will be purified by the carbon fiber filter (or ceramic filter) and the UF filter in seires
- Carbon fiber filter (or ceramic filter) and UF filter can be replaced separately

Outer Carbon Fiber Filter

Inner Micron Ultrafiltration Membrane Filter

LT-F4-CF-UF

LT-F-U1-UF

LT-F-U1-CF

Ceramic Filter + UF

Outer Ceramic Filter

Inner Micron Ultrafiltration Membrane Filter

LT-F4-CRM-UF

LT-F-U1-UF

LT-F-U1-CRM

The back wash process of outer filter and the rinse process of the inner UF filter are the same as those on the Page “87”

The switch is the same as those on page “88”

Ceramic filter/Back wash/Without brush (LT-F1)

Note: Please refer to the next page for the back wash switch LT-F1

LT-F1-CRM

LT-F-3
(LT-F-3 filter is bigger than LT-F-2 filter)

LT-F1-2 switch
Different appearance

Cabon fiber filter / Back wash / Without brush

Water flow diagram of
back wash carbon fiber filter

4 Working Positions

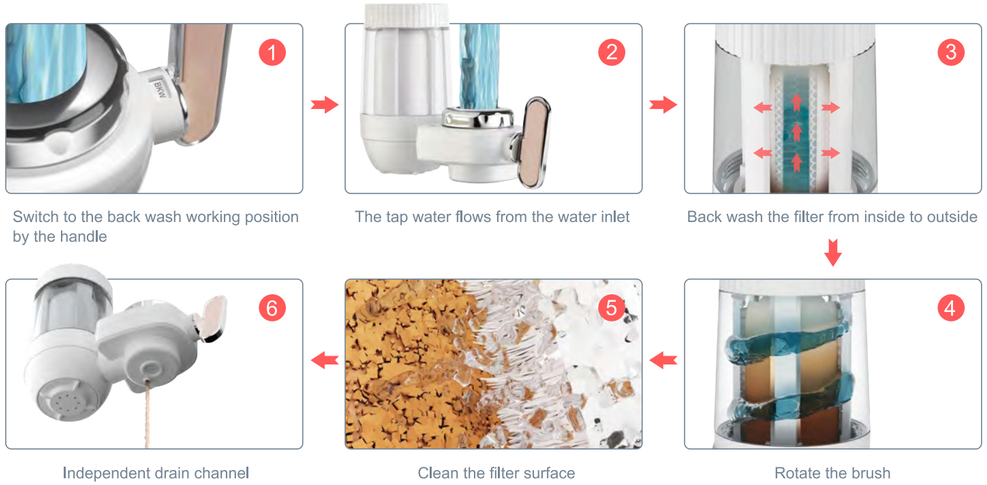

Back wash Faucet Purifier With Brush (LT-F1)

- Back wash the filter
- Ceramic valve switcher, long life, no leakage
- The brush can clean the filter easily
- Dirty water flows out from independent drain outlet

NEW Innovation

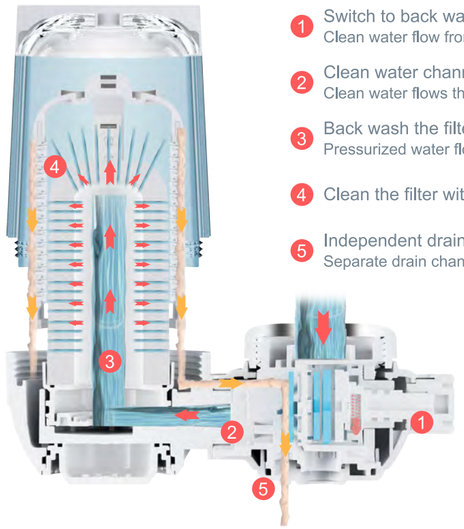

4 Working Positions

Water flow diagram of back wash the ceramic filter

1. Switch to back wash working position
   Clean water flow from tap water
2. Clean water channel independently
   Clean water flows through the patented valve
3. Back wash the filter
   Pressurized water flow from inside to outside of the filter
4. Clean the filter with the brush
5. Independent drain channel
   Separate drain channel discharges dirty water

Ceramic valve disk

Multi-functions | Long life | No leakage

LT-F1-2 switch
Different appearance

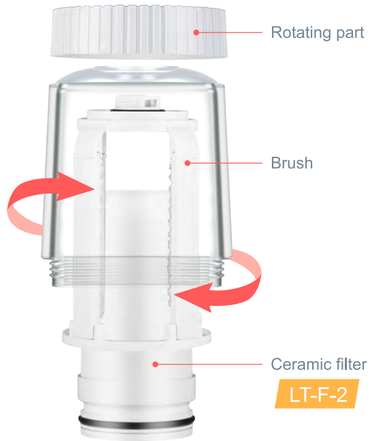

Rinseable Faucet Purifier With Brush (LT-S1)

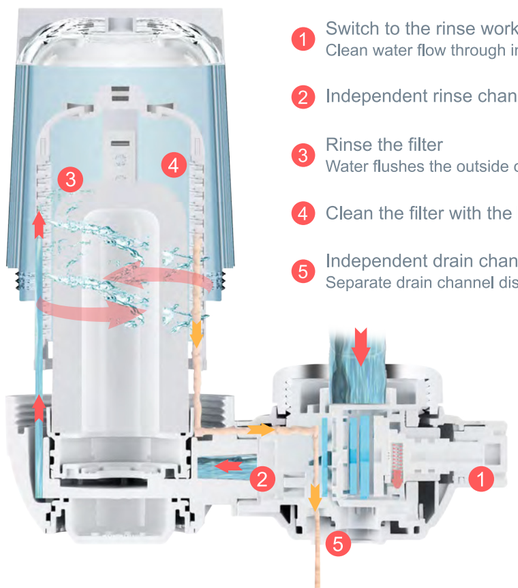

- Rinse the filter (Not back wash)
  Rinse water will not enter the inner side of the filter
- Ceramic valve switcher, long life, no leakage
- The brush can clean the filter easily
- Dirty water flows out from independent drain outlet

NEW Innovation

LT-S1-CRM-BRH

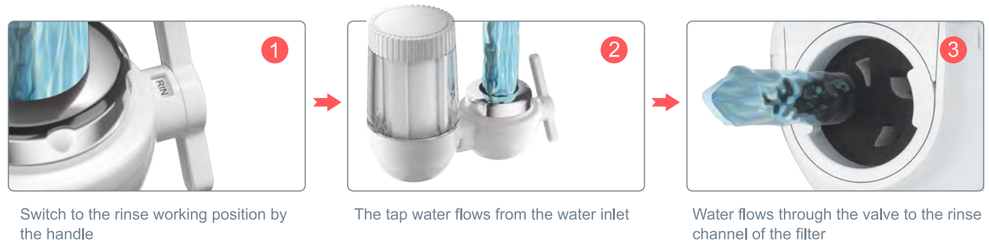

1. Switch to the rinse working position
   Clean water flow through independent cleaning channel
2. Independent rinse channel
3. Rinse the filter
   Water flushes the outside of the filter
4. Clean the filter with the brush
5. Independent drain channel
   Separate drain channel discharges dirty water

The flushing water flows from the bottom of the filter to the opposite side, and the filter outer surface is flushed upward.

Switch to the rinse working position by the handle

The tap water flows from the water inlet

Water flows through the valve to the rinse channel of the filter

Rotate the brush

Clean the filter surface

Independent drain channel

4 Working Positions

Tap water

Tap water shower

Ceramic valve disk

Multi-functions Long life No leakage

Purify

Rinse

Counter Top Rinseable UF Purifier

Ultrafiltration directly drinking

- The outer surface of UF can be rinsed
- Extend the life of UF
- Switch the knob to rinse
- It can be cleaned without taking out the filter
- The drain water will not pollute the carbon filter
- Independent drain outlet

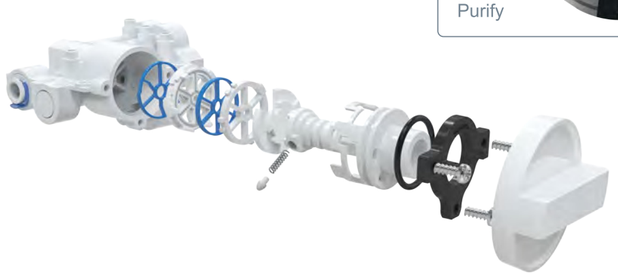

TS1-S
Stainless steel housing

TS1-P

H4 Valve Appearance Design

LT-F-2
or
LT-F-3

Ceremic+GAC filter

If the Ceremic+GAC filter above is used, all housing can be used

A1

LT-F-G1-CF

Carbon fiber filter

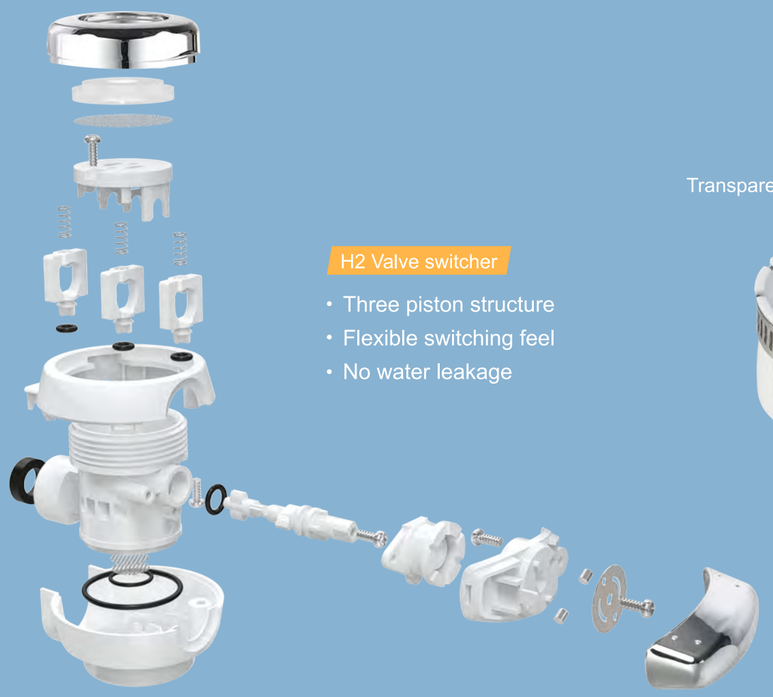

LT-F-G1-UF

UF filter

A2

If the Carbon filber+UF filter above is used
only these two filter housing (A1 or A2) can be used

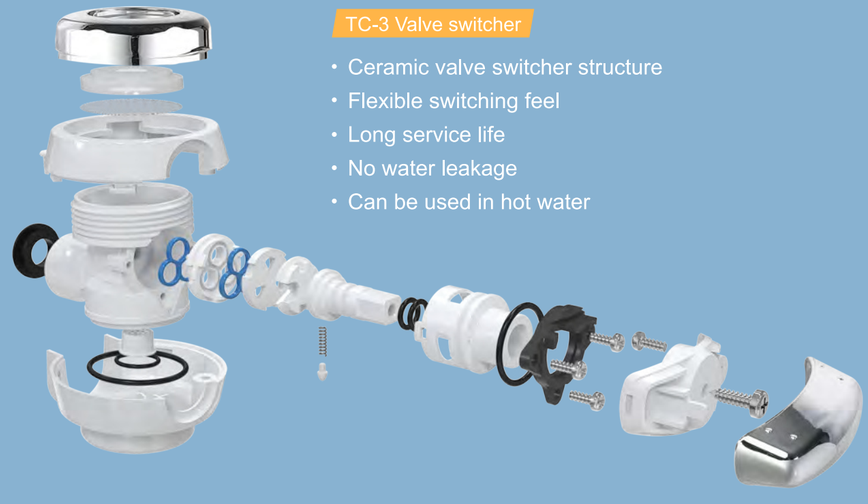

H2 Valve switcher

- Three piston structure
- Flexible switching feel
- No water leakage

Transparent silicone of food grade

TC-3 Valve switcher

- Ceramic valve switcher structure
- Flexible switching feel
- Long service life
- No water leakage
- Can be used in hot water

Coconut CTO

2 Working Positions Faucet Purifier

- Simple switch, 2 working positions
- It can be used like H2 and TC-3 valve switcher and H2/H3 and H4 valve appearance, so most housing can be used like A1/A2/A4-A9 shown on page 101 and 102

LT-T27-B

T27 valve core

The valve switcher and appearance are integrally formed
