N520-E

SERIES

低能耗·高效率·智能包缝机

Low Energy Consumption High Efficiency Intelligent Overlock Machine

节能速缝王

低能耗高效智能包缝机

一体型超高速（节能直驱）包缝机

Integrated Ultra-high-speed (energy-saving direct-drive) Overlock Machine

N520-E

直驱/Direct drive

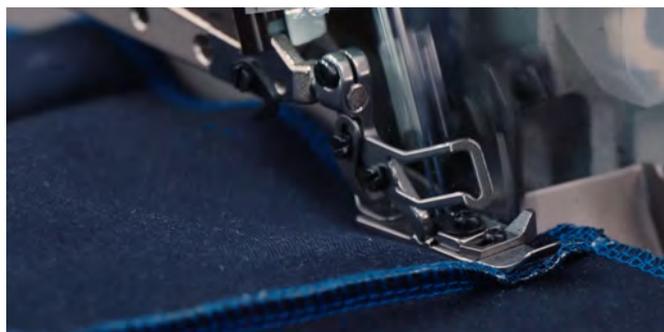

采用节能型驱动技术，待机功耗仅 5W，工作状态下能耗比行业平均水平低 28%。支持缝制多厚度面料（薄棉至厚牛仔）缝制，满足不同面料的高效缝制需求，适用于工作服、睡衣、运动服等中厚布料的包边缝作业。悬浮屏操作面板设计简洁，调节参数更高效。缝迹张力稳定，经 500 小时连续测试无故障，节能与高效双认证，标配上下停针位功能。

Adopting energy-saving drive technology, the standby power consumption is only 5W, and the energy consumption in working state is 28% lower than the industry average. It supports sewing of fabrics with various thicknesses (from thin cotton to thick denim), meeting the needs of efficient sewing of different fabrics, and is suitable for overlock operations of medium and thick fabrics such as work clothes, pajamas, and sportswear. The floating screen operation panel has a simple design, enabling more efficient parameter adjustment. The stitch tension is stable, and it has passed a 500-hour continuous trouble-free test. It has dual certifications for energy conservation, environmental protection and high efficiency, and is standard equipped with upper and lower needle stop position functions.

低耗节能型电机，高效稳定

Low-consumption and energy-saving motor, efficient and stable

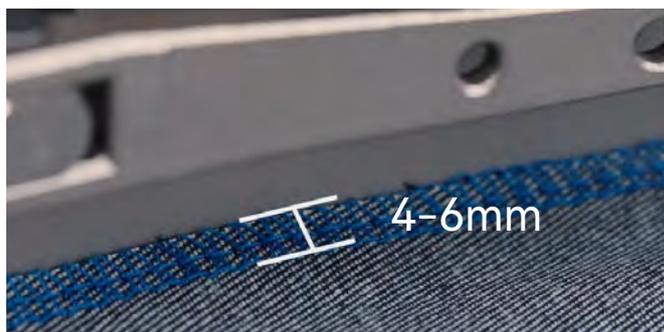

强劲压脚，过硬过厚牛仔缝制

Strong presser foot, sewing over ridges and thick denim

针杆直接驱动，薄棉、弹力棉，顺畅缝制

Direct drive of the needle bar, smooth sewing of thin cotton and stretch cotton

包边线迹稳定、美观，包边线迹 4-6 毫米

overlock stitch is stable and beautiful, with a width of 4-6 millimeters
